# NĀVIGATIŌ IN LŪNAM

Hodiē, scientiam mīrantēs, habēmus  
āeronāvēs, quāe sonum superant!  
Radiōs autem igniferōs, quī per cælum  
īfīnīta millia trāseunt!  
Vim autem nucleārem nobis  
subjectam, excellentissimam  
potestātem!  
Quid vērō hominibus crās fiet?  
Sūrsūmne mox ā Terrā in īfīnītum  
spatium ināne ferentur?  
Quattuor virī fortēs ad hujusmodī  
questiōnem rēpondere cōnantur, quī  
viam inter planētās signant, radiō in  
īcognitum vehuntur, in Lūnam  
nāvīgant.

In dēsertō alicubi occidentis āridō.

Circumī-  
mus?

CAVE  
CAMPUM CLAUSUM  
OMNIBUS INVITUM  
EXERCITUS C.F. JUSSU

Etiam, domne! Exercitus  
enim experimentum novī  
radii hāc noctū in campō  
agit! Doleō quod tibi inīre  
nōn licet.

In campō interdictō omnia  
parāta sunt!

Mittitur in duo  
minūta! Astāte!

Tūtī sumus in speculā  
cæmenticiā hāc, etiamsi radius  
ignifer displōdātur. Perveniat autem  
radius noster cum satellite artificiōsō  
ad altitudinem centum milium  
stadiōrum super Terram!

Animīs omnium intrā turrīm intentīs,  
appropinquat discrīmen!

Ūnum minūtum usque ad  
missionem! LIX secunda,  
LVIII, LVII!

Duo autem maximē omnium sollicitantur, professor  
Carolus Gæsoscrobis, dē nātūrā rērum perītus, et  
præfectus militiæ ēmeritus Depstor.

Tū quidem, ō professor Gæsoscrobis,  
radium ā tē dēscriptum fabricātus es,  
dē hīs rēbus perītissimus. Ego autem  
quod mē adjūvistī gaudeō.

XLII secunda,  
XLI, XL, XXXIX!

Sed tū animō prīmus rem concēpistī, prāfecte Depstor! Quī diū aliīs militiæ prāfectīs dicēbās satellitem artificiosum posse sūrsū missū Terram circūire. Istī quidem nōn solum tē contempsērunt sed dīmīserunt. Nōs autem tē vērā dixisse ostendēmus.

XXIV secunda, XXIII, XXII, XI, XX!

Est autem et alius quī in hujusmodi cōsiliō versatur, Jōsēphus Suāvis Brūclīnēnsis ē Cīvitātibus Fōederātis Americæ.

Ego sum vectiarius quī radium igniferum dīmittit. Hercule, cum hoc audīverint vīcīnī in Brūclīnō, habēbō nōmen quantum āthlētārum!

XI, X, IX, VIII, VII.

Lentē trahitur ad discrīmen tempus

IV, III, II, missus!

Ē carceribus!

Ecce, abit!

Subitō autem...

Radius displōsus est!

Postea...

Rem male gessimus, o professor!

Iterum autem tentēmus, o prāfecte!

Itane? Unde nobis opēs, o professor? Nōn enim poterō blandiendō aliam ā Congressū pecūniam parere, præsertim cum ista rēs male ēvēnerit!

Officīnārum possēsōrēs nobīs opitulentur. Tū igitur cūrā hoc. Ego autem prāstantiōrem dēscribam radium. Nōndum enim superātī sumus.

Cui bonō? Nam radius ignifer  
eōrum ante oculos eōrum modo  
dīruptus est, ipsī autem alium jam  
concoquunt! Profectō nōn  
intelligunt istī duo luctātōrēs  
sē ter abjectōs esse.

...et in Lūnam  
īnsequēns  
radius ignifer  
noster intendētur!

Certē,  
professor! Lūna  
enim mēta  
nostra!

Lūna? Herculēs! Istī īnsāniunt ac  
furunt! Nihilōminus in Lūnam  
mittere radium igniferum volunt! Ō  
vānī in somniis suis!

Somnium autem ēvenit, dum prāfectus militiāe Depstor  
sua perficit, vīsēdō Jācōbum Puerum, juvenem  
officinārum possessorē.

Ō Puer, dīcō tibi nōs adjuvandōs! Necesse  
enim aliquem prīmum in Lūnam pervenīre,  
melius autem Americānum! Quod, cum  
mīles sim, sciō! Quid tibi amplius dīcam?

Sed...

Hæc sunt prō ipsā  
Americā, cum in pāce  
tum etiam in bellō.

Ēsto, sī est ita, ut  
dīcis, quid  
negābō? Vīncīs!

Et colligam tibi aliōs  
duodecim adjūtōrēs!  
Nunc enim ipse  
studeō!

Bellē! Eōs in conventum  
octāvō diē vōcā, ad  
videndum exemplar  
astronāvis professoris  
Græsoscribis.

Intereā autem in domō peritī...

Per noctem opus  
fēcistī, cārē!

Factum'st,  
Æmilia,  
factum'st!

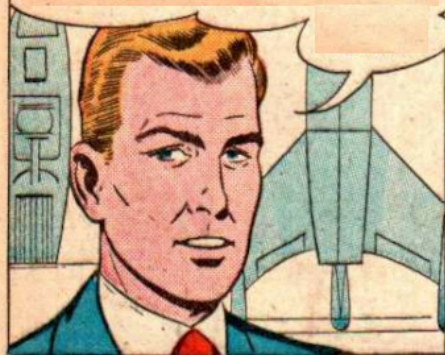

Cūr? Cūr Columbus Americam invēnit?  
Cūr virī fortēs iter in polum arcticum cum  
labōre fēcērunt? Quia prācursōrēs  
perīclitantur! Quia per omnia sēcula  
hominēs incognitum explōrant! Hēc enim  
ratiō!

Estō, sed pervenietne nāvis tua  
in Lūnam? Ut potest radius  
ignifer iter viciēs centēnōrum  
millium stadiōrum per spatium  
ināne facere? Nam vidētur  
fierī nōn posse.

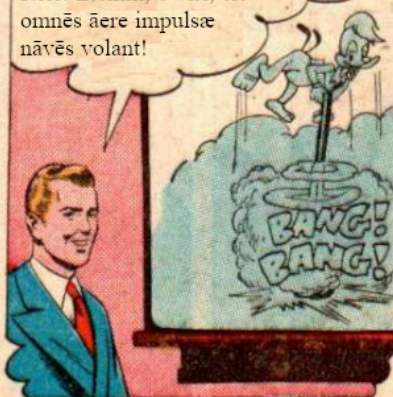

Spectāte! Ecce parāta ad hoc  
pellicula cum illā personā  
pictā Pīcō Picumnō! Bene,  
accende prōjectōrium!

Cum Pīcus Picumnus tēlum  
mīserit, magna disruptiō eum  
repellit. Hoc est enim principium  
radiōrum omnium igniferōrum!

Hoc quidem in majus dictum'st,  
Pīcus autem experiendō cognōscit  
sē vī repulsūs sūrsūm in āerem  
ferri! Etenim, ō virī, sic  
omnēs āere impulsae  
nāvēs volant!

Nunc autem Pīcus in Lūnam  
radiō igniferō vehitur, ūtēns  
principiō repulsiōnis  
ut ē Terrā excēdat!

Pīcus cognōscit sibi magnīs radiī vīribus ūtendum esse  
ut ē Terrā gravitatē sē exuat, quā immānis magnētis  
similis est.

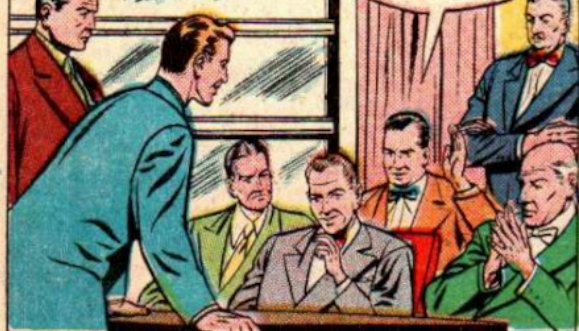

Sed ecce: cum Pīcus exsolūtus Terrā trahentis sit,  
tum potest, radiō igniferō exstinctō, reliquum in  
Lūnam iter libere cādēns prātervehī. Itaque percurrit  
sēdecies centēna millia stadiōrum, ō virī, nec ūllā  
ad combūrendum materiā ūtēns!

Propterea facile'st pervenire in Lūnam. Tantum enim opus est materiā ad combūrendum sufficiente effugere gravitatem Terræ!

Habēsne tamen talem materiā, ō professor?

Habeō! Hæc enim mächina vī nucleārī impulsa ütēnsque materiā nucleārī valēbit. In bellō quidem potestās nucleāris primum jūvāvit. Et in pāce autem, ō viri, per radium igniferum probābimus potestātem nucleārem jūtūram esse! Nōne hæc ūna rēs facit cōsiliū ipsum dignissimū?

mächina vī nucleārī impulsa

Prorsus: vincis, ō professor!

Grātias agō vōbīs, ō viri. Quamobrem cōnfestim manūs astronāvī admovēbimus!

Ōratiō admirābilis, ō professor! Instruēmus igitur radium igniferum ūna cum nautīs.

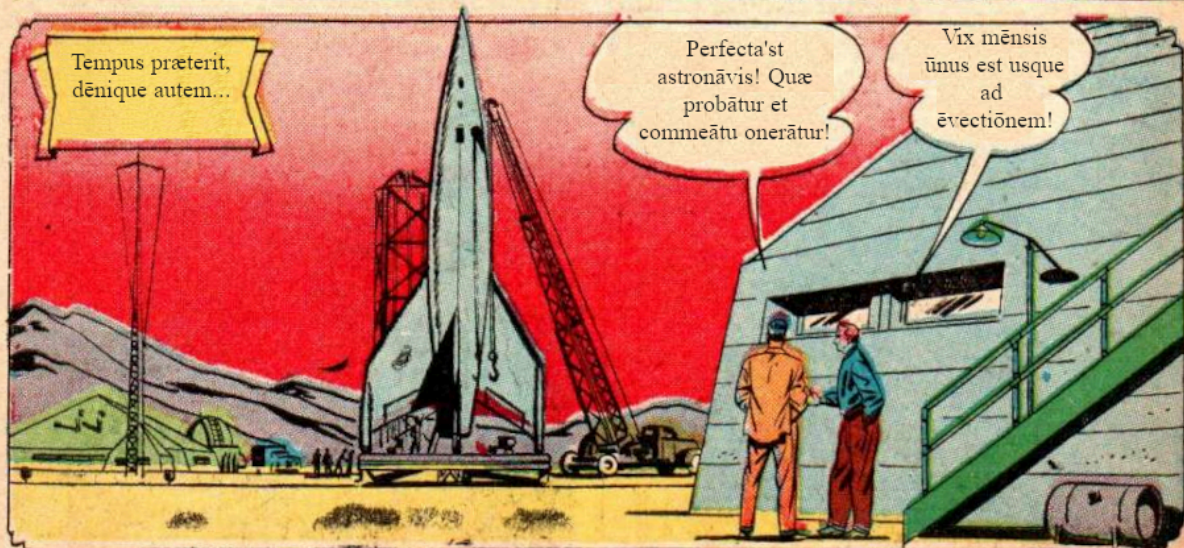

Ad primum in Lūnam nāvigātiōnem!

Tempus præterit, dēnique autem...

Perfecta'st astronāvis! Quæ probātur et commeātu onerātur!

Vix mēnsis ūnus est usque ad ēvectiōnem!

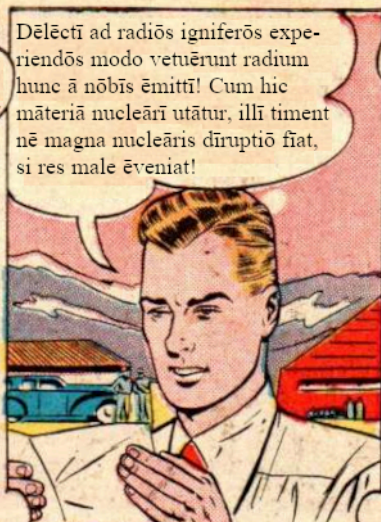

Ō professor  
Gæsoscrobis,  
vidëris mihi  
conturbārī!  
Quid agitur?

Heu, nūntius trīstis!  
Nam Epistula hæc  
modo Vasingtoniā  
D.C. pervēnit.

Dēlēctī ad radiōs igniferōs expe-  
riendōs modo vetuērunt radium  
hunc ā nōbīs ēmittī! Cum hic  
māteriā nucleārī utātur, illī timent  
nē magna nucleāris dīruptiō fiat,  
si res male ēveniat!

Ergo repressī  
sumus!

Manēte! Cūr nunc  
eum nōn ēmitti-  
mus, ante quam vērō  
nōs reprīmant? Nūlla  
enim lēx obstat quō-  
minus eāmus! Abeā-  
mus primā lūce in  
septemdecim hōrās  
posthæc!

Furis, ō Puer! Quia dēsunt  
nōbīs nautæ parātī!

Cujus egēmus nōs? Nam  
ego præfectusque cursum  
dirīgāmus, tū autem, ō  
professor, māchinā ūtāris.  
Jōsēphus Suāvis autem  
nōbīs telecommū-  
nicātiōnis peritus!

Mihi  
placet!

Mihi quoque!  
Nōn reprīment nōs  
adhūc prōgressōs!

Euge! Ergō primā  
lūce ēvehēmur  
nāvīgantēs in  
Lūnam!

Melius est Jōsēphum  
Suāvem dē hīs rēbus  
certiōrem fierī...

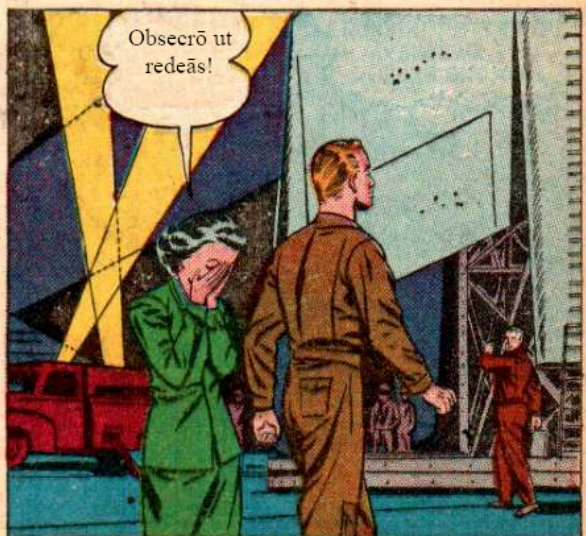

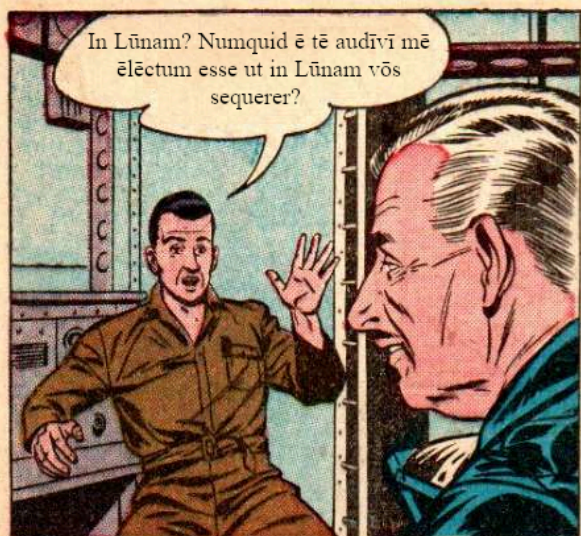

Avē, ō præfecte!  
Quid agis? Vidëris  
tam commōtus quam  
afflictus!

Jōsēphe, mūtātō cōnsiliō,  
primā lūce ēvehēmur! Tēque  
ēlēgimus quārtum ut in Lūnam  
eāmus!

Tantumne est?  
Ibō igitur in  
Lūnam!

Tempus statūtum prope est, quattuor  
autem viri fortēs parātī sunt!

Nāvis probāta et onerāta'st! In  
quīnque minūta lūcēbit!  
Sūrsūm in cellam!

Subitō...

Manēte! Cōsistite!  
Audīvimus hoc!  
Ēdictum exiit ut  
prohiberet vōs ā  
Terrā ēnāvigāre.  
Cōsistite!

Ēdictum  
magistrātūs!

Nunc autem nihil nōs prohibēbit!  
Ante quam appāritor ad nōs  
pervēnerit et ēdictum in pūblicum  
proposuerit, in nāvem inibi-  
mus! Sūrsūm scānsōrium!  
Festināte!

Cōsistite!

Abī prō vītā tuā!  
Radius ignifer in ūnum  
minūtum ēmittitur!

Cōnfestim in nāve...

Jacentne omnēs in  
pulvināribus suis?  
Trīgintā secunda ad  
missionem!

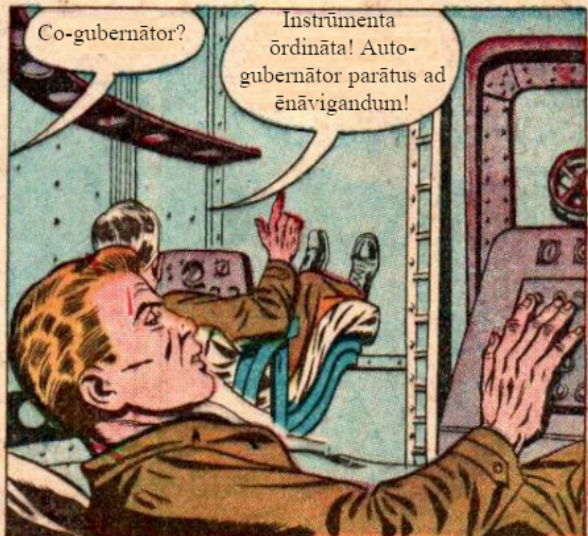

Generātor?

Generātor parātus  
ad  
accendendum!

Co-gubernātor?

Instrūmenta  
ordināta! Auto-  
gubernātor parātus ad  
ēnāvigandum!

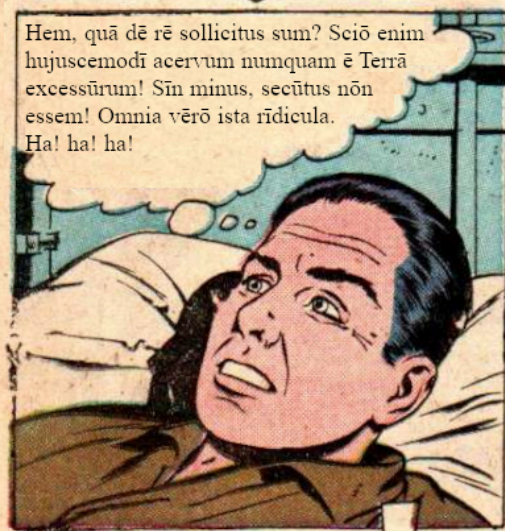

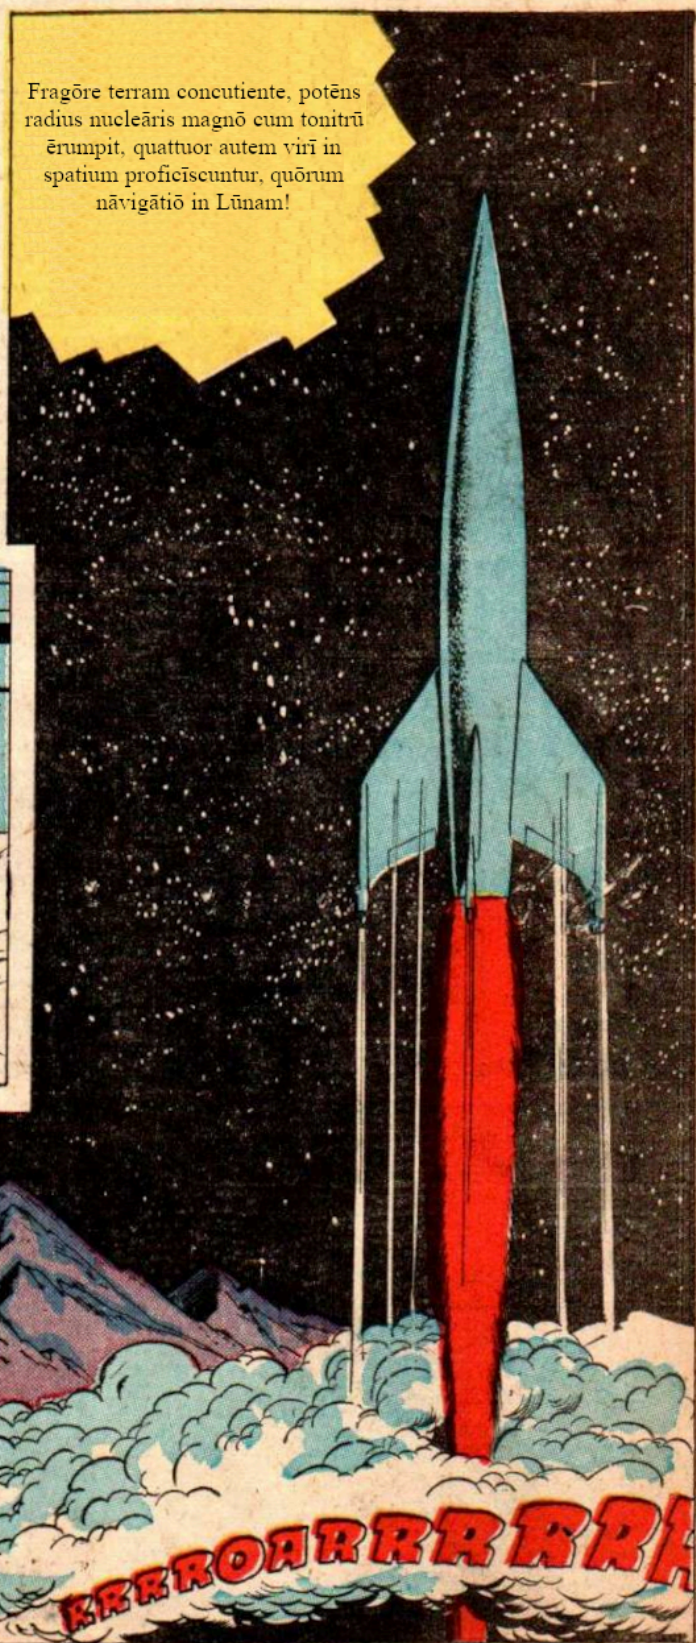

Ā tēlecommūnīcātiōne?

Omnia bellē sē  
habent, domine!

Fragōre terram concutiente, potēns  
radius nucleāris magnō cum tonitrū  
ērumpit, quattuor autem virī in  
spatium proficiscuntur, quōrum  
nāvigātiō in Lūnam!

Hem, quā dē rē sollicitus sum? Sciō enim  
hujuscemodī acervum nunquam ē Terrā  
excessūrum! Sīn minus, secūtus nōn  
essem! Omnia vērō ista rīdīcula.  
Ha! ha! ha!

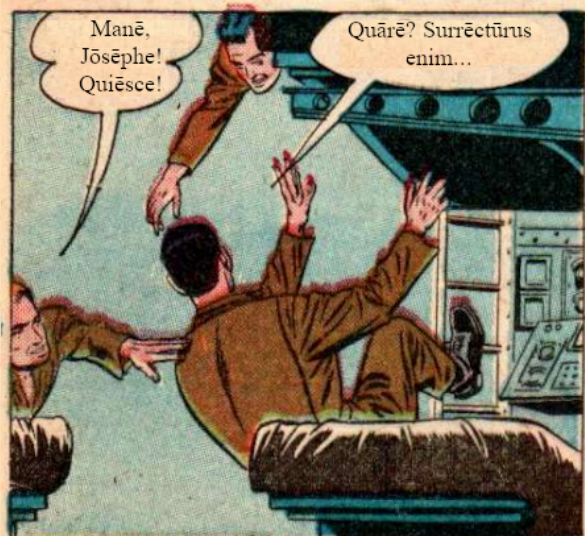

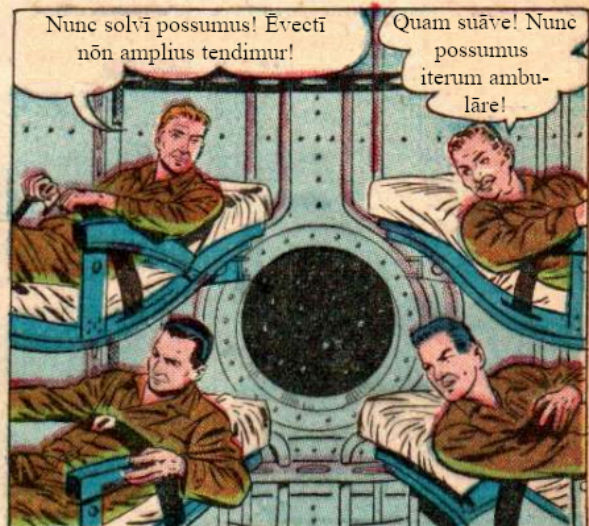

Missor parātus! X secunda  
reliqua, IX, VIII, VII, VI,  
V, IV, III, II,  
proficiscimur!

KRRROARRRRRRRR

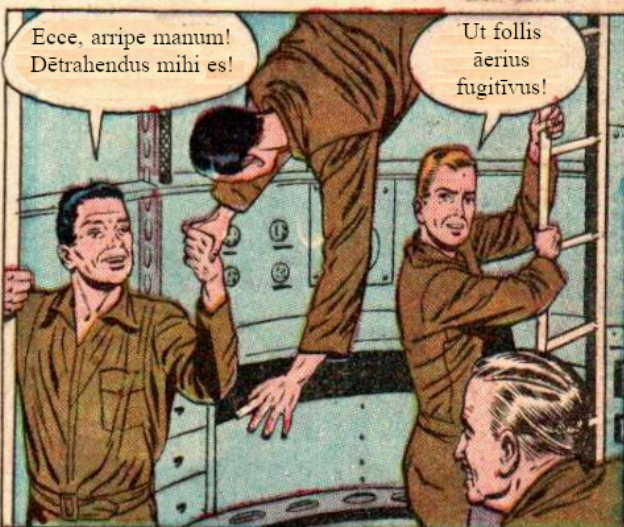

Hercule,  
succēdit hoc!

Sānē, Jōsēphe! Nōn enim est  
gravitās quæ teneat nōs hīc.  
Neque amplius sūrsūm neque  
deorsūm!

Etenim  
inambulēmus  
trāns tēctum!

Omnia vīdī! Modo  
mē muscam  
hūmānam  
appellāte!

Hem, estne illa  
Terra?

Profectō! Sumus enim nunc  
amplius quīndecim millia  
stadiōrum ab eā, in Lūnam  
nāvigantēs.

Nunc primum Jōsēphus  
Suāvis cognōscit quid  
novissima facta dēmōnstrent.

Num dīcitis hanc nāvem scelestam in  
Lūnam nāvigāre posse? Verum nōn  
ībō ego! Benignē mē vexistis, sed  
ēmittite mē!

Nē ad ineptiās  
abeās, Jōsēphe!  
Nunc necesse tibi  
viam perficere!

Cōnsiderā,  
Jōsēphe, ho-  
minēs tē virum  
fortissimū aēsti-  
matūrōs esse!

Quis vult fortissimū aēstimārī?  
Oportēbat autem mē obviū  
bellae pūpae esse. Quæ vērō  
dolēbit quādo audīverit mē eam  
reliquisse tamquam in Lūnam  
vetulam itūrū.

Bonō animō sīs, Jōsēphe! Cum redieris,  
fortissimus omnibus puellis eris! Nunc  
autem, quīn stationem tuam ad quadrum ē  
puppī tēle-vīsificum inīs?

Faciam,  
professor!

Terram per quadrāgintā mīllia  
stadiōrum cōsiderēmus!

Quam pulchrum! Tōtam enim  
Americam, ab ōrā ad ōram  
cernimus! Omnēs montēs et  
lacūs et flūmina!

Et magnās urbēs! Ecce Angelōpolin  
et Sicāgum et Novum Eborācum!  
Mirābile vīsū!

Hem, et Brūclīnum vidēō!  
Quod me commonet dē  
hodiernō lūdō cum  
Sicāgoēnsibus Catulīs  
quanta faciant!

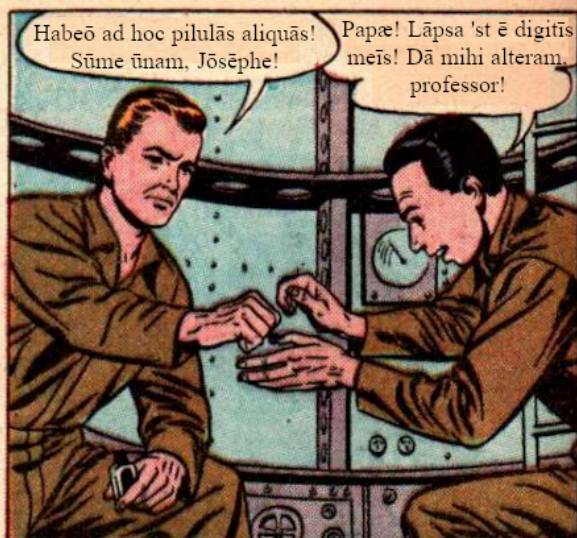

Subitō...

Ō, vertigine  
labōrō! Nauseō!

Nōn ob mare sed ob spatium  
sive quia deest gravitās! Quasi  
quī in scānsoriō vēlōciter  
diūque dēscendit!

Habeō ad hoc pilulās aliquās!  
Sūme ūnam, Jōsēphe!

Papae! Lāpsa 'st ē digitīs  
meīs! Dā mihi alteram,  
professor!

Cūr? Nōn est ista humī  
dēlāpsa! Nihil libērē cadēns  
nec dēlābitur nec dilābitur!  
Omnia modo pendent! Sūme  
igitur eam!

Pūtēs, fibulam in nāvī  
istā nōn āmitterēs etsi  
cōnārēris!

Postea omnēs pilulās sumunt...

Melius mihi est! Tempus au-  
tem est nōs, Terrā per radiō-  
phōnum vocātā, ut referā-  
mus rēctē esse!

Certē, praeefecte!

Puteōs Siccōs vocō! Puteōs  
Siccōs, Terram vocō!  
Astronāvis Diāna Siccōs,  
Terram vocat!

Statiō vocā-  
tīva Puteī  
Siccī vocat!  
Vōs audī-  
mus! Rēctēne  
estis?

Audīvimus! Ēvectī  
ordinātē nāvīgāmus!  
In Lūnam  
prōgredimur, nisi  
somnia ista!

Sānē in Lūnam  
prōgredimur! Quod  
tibi, professor,  
juventūtem tuam  
cōsummat!

Tibi autem, ō  
praeefecte, hoc  
significat aliōs  
praeefectōs  
veniam ā tē  
īnsānō appellātō  
supplicātūrōs  
esse!

Ēsuriō, inquam ego! Quid?  
Edāmusne primum in spatiō  
cibum?

Istud quod gravitās abest cognōscō!  
Nam nec mēnsulā nec mēnsā  
opus est! Ante autem pendeant  
fercula!

Īō iō! Primum mūsam  
edō! Potius, manē!

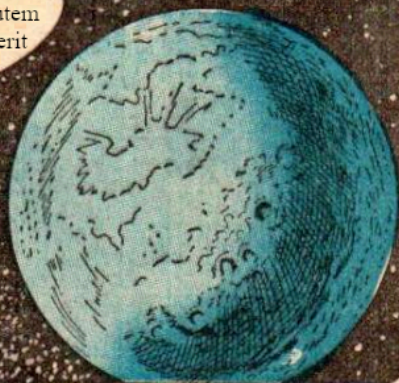

Primum pānicellum edō!  
Nōli abire tū

Aliquamdiū astronāvis per vacuum infinitum viam suam ad  
Lūnam fodit.

Pristinā centum quinquāgintā millium  
stadiōrum per hōram vēlōcitāte liberē caden-  
tēs ad Lūnam prātervehimur! Nullā autem  
māteriā ad combūrendum opus nōbīs erit  
dum ad Lūnam  
appellimus.

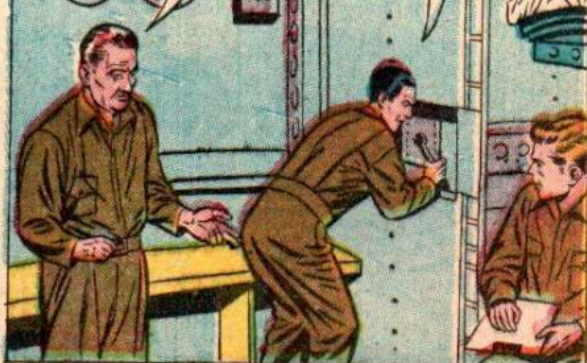

Dicis nōs grātis ēveli  
reliquum iter pāne per  
viciēs centēna millia  
stadiōrum?

Ita! Newtonī enim lēx  
mōtūs prīma dicit quidquid  
in vacuō movētur in mōtū  
permanēre nisi retineātur.  
Nihil autem nōs retinet, neque  
aēr neque aliud quicquam!

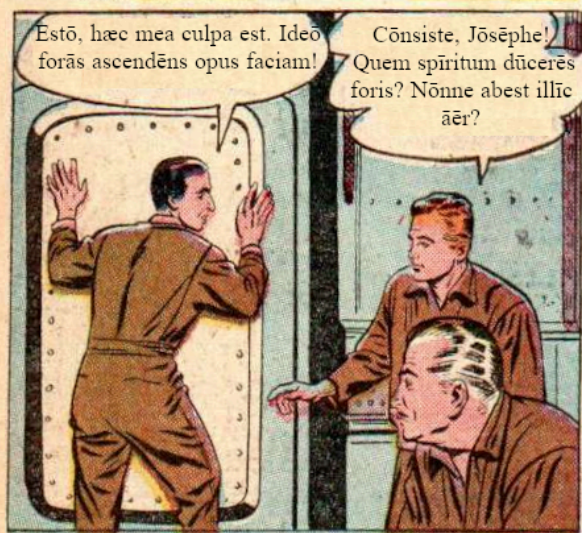

Māteriā ad combūrendum insuper  
opus nōbīs erit tantum ut ad  
Lūnam appellāmus. Nunc vērō  
antennam auto-gubernātōris  
monitōriam probēmus.

Hæret, professor! Neque  
exit! Atquī eam bene  
ūnxī antequam  
discēdimus!

Bene! Nunc ōstium exterius  
aperimus! Nunc āēr ē cellā  
āērī imperviā in spatium  
effertur!

Et sine āere scīlicet nūllus sonus audītur! Apertane  
sunt exceptācula ēmissāria in galeīs vestrīs?  
Auditisne mē?

Bene,  
professor!

Papæ! Nūllus omnīnō āēr circā nōs!  
Hercle, spatium est profectō nigrum!  
Illic longē exstat Terra!

Statim alligāte vōbīs fūnēs  
sēcūrītātis, ō virī! Etsi  
calceāmenta magnētica nōs  
tenent, nē periculum pendēdi  
per spatium adeāmus!

Ecce antenna monitōria quæ  
hæret! Brevī tempore solvēmus  
eam!

Vōs duo sine mē eam sarciātis! Ego  
autem radiōs igniferōs ā tergō  
īspiciam ut cognōscam eōs bene  
sē habēre!

Fūnis sēcūrītātis brevior est  
quam ut radiōs videam. Estō,  
calceāmenta magnētica per  
reliquum mē tenebunt.

Ut opīnor, radii igniferi  
bene sē habent!

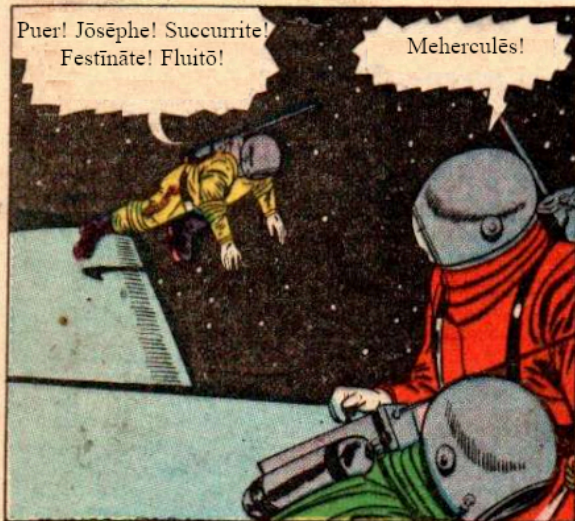

Nunc redeō et... quid? Pendeō!  
Oblītus sum, genibus flexīs,  
calceāmenta magnētica ab alveō  
chalybēiō disjūncta esse!

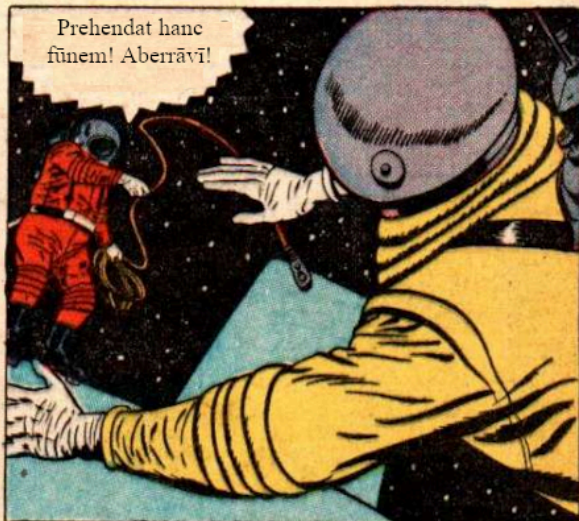

Puer! Jōsēphe! Succurrite!  
Festīnāte! Fluitō!

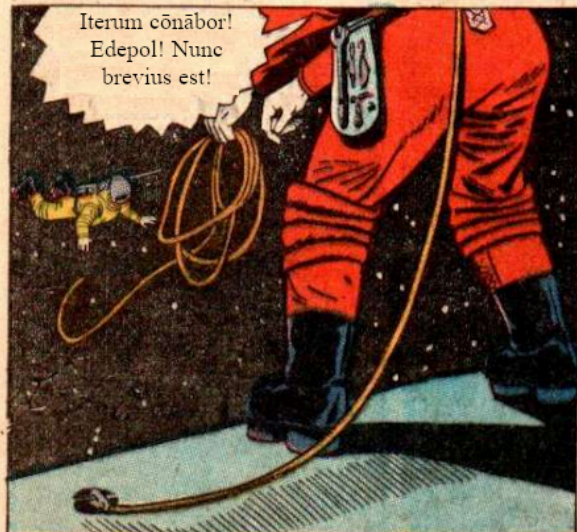

Meherculēs!

Prehendat hanc  
fūnem! Aberrāvī!

Iterum cōnābor!  
Edepol! Nunc  
brevius est!

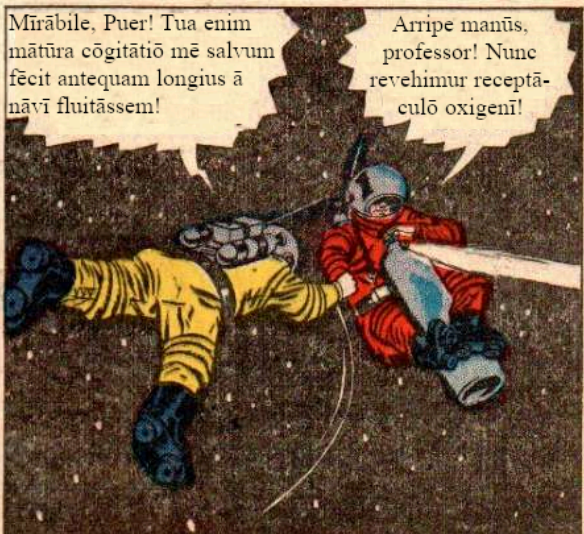

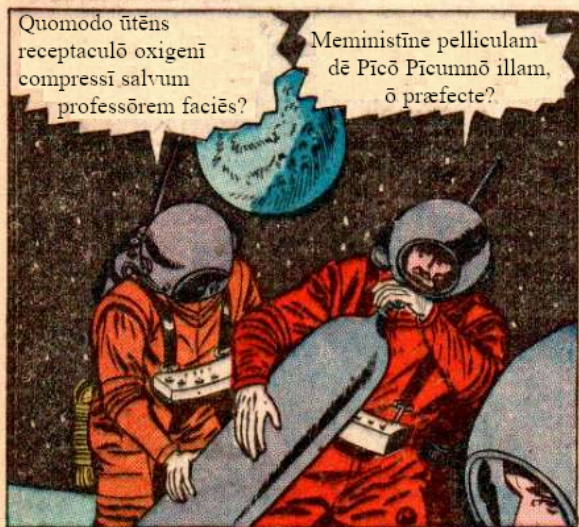

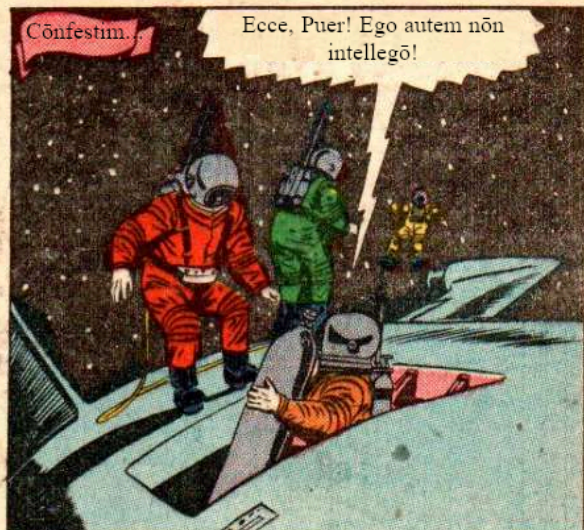

Prō deum fidem! Professor  
pendēre nōn cessābit, sed  
festīnat lentē in spatium  
vacuum!

Quam miser perit sōlus  
in spatiō! Nōnne  
possumus salvum eum  
facere, ō Puer?

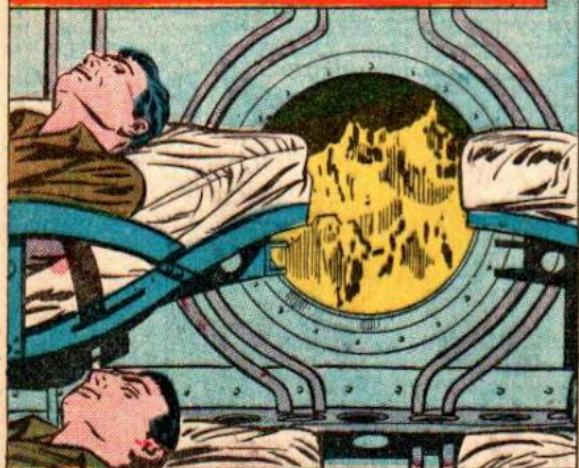

Parumper omnēs silent...

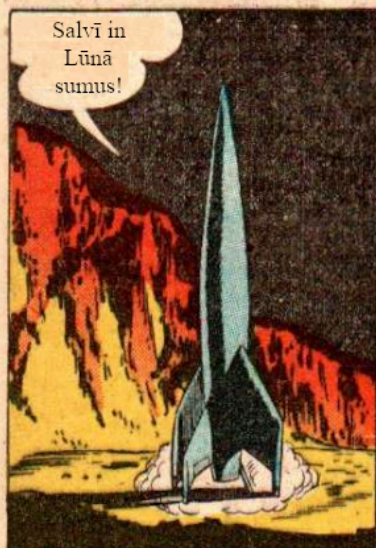

Sed solum sōpiuntur nautæ et cōfestim...

Appulimus! Gyroscopia  
quiēscant! Ancora  
dēmīttatur!

Salvī in  
Lūnā  
sumus!

Bene  
appulisti,  
Puer!

Tū scīs mē male  
fēcisse! Plūs enim  
combussimus quam  
oportēbat! Utinam  
nē egeāmus cum  
ēnāvīgandum fuerit!

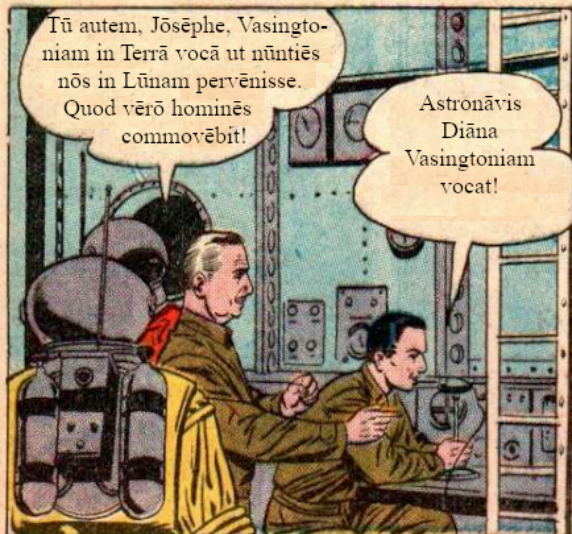

Nōlite nunc hoc cūrāre! In Lūnā  
sumus, ō virī. Professor, tū et Puer  
vestēs astronauticās induite! Meritus  
enim es ut prīmus in Lūnā  
ēgrediāris!

Tū autem, Jōsēphe, Vasingto-  
niam in Terrā vocā ut nūntiēs  
nōs in Lūnā pervēnisse.  
Quod vērō hominēs  
commovēbit!

Astronāvis  
Diāna  
Vasingtoniam  
vocat!

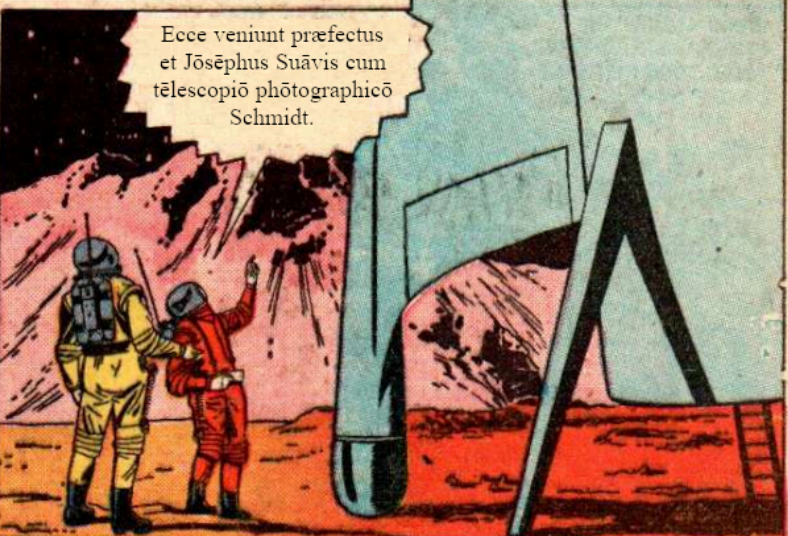

Intereā...

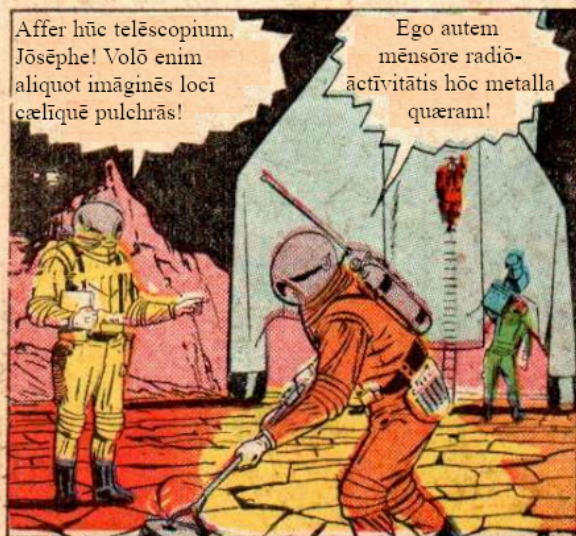

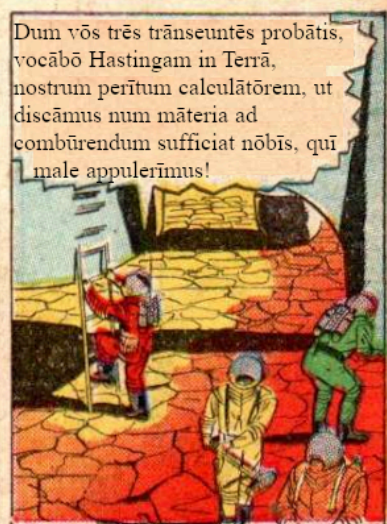

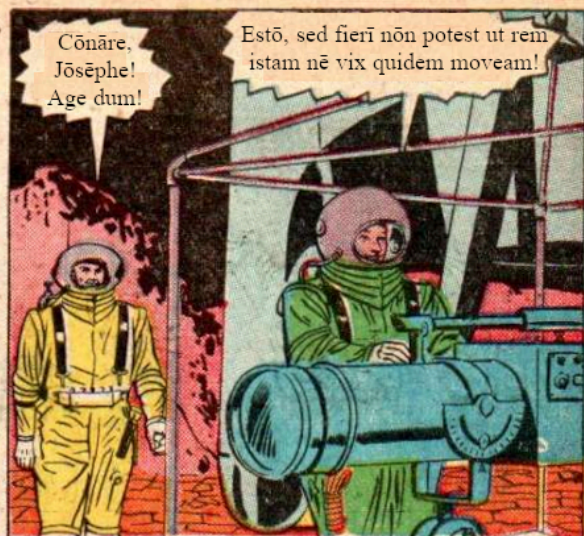

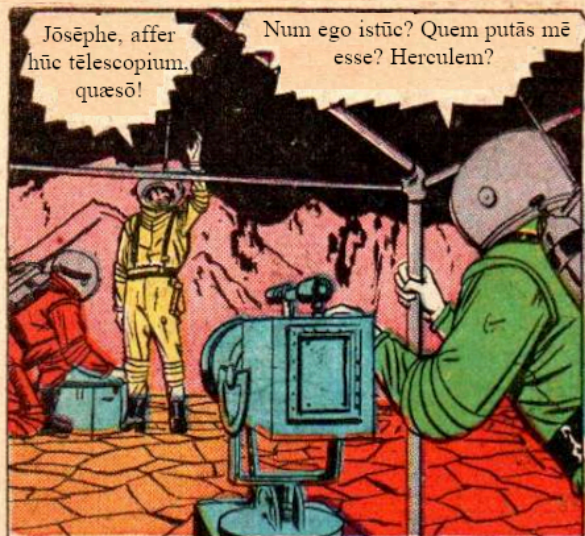

Ecce, humī dēfertur nostra scāla  
automatāria! Tū autem  
prīmus dēscende, professor!

Paulum retrō,  
Jōsēphe! Nunc tolle  
braccia quasi  
magnum pondus  
sustinēns.  
Sic est!

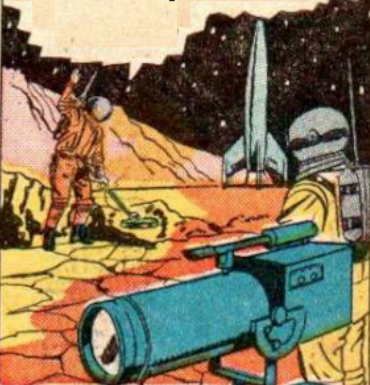

Ō? Nōn  
intelligō! Cūr  
figūra ista?

Quia, Jōsēphe, Terrā super tē  
stante, similis in imāgine hāc eris  
Atlantis orbem sustinentis! Ipsam  
omnibus amīcīs tuīs  
ostende!

Professor, mēnsor radioāctīvitātis  
meus mētītur! Quod significat  
Ūranium hīc positum esse!  
Nōne nāvīgatiō ista ūtilis?  
Reddet enim aliquandō mūtuum!

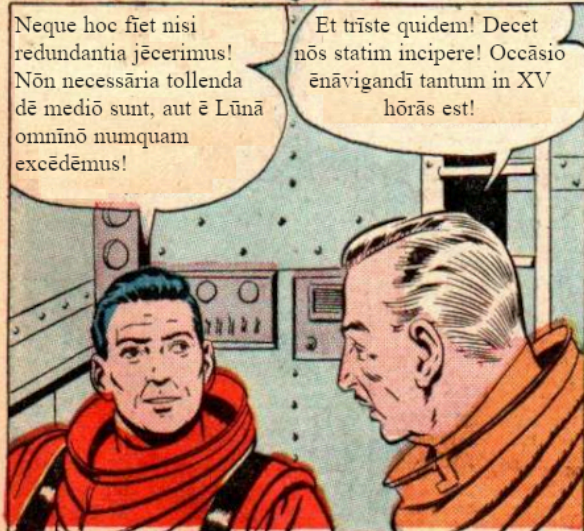

Ō Puer, nuntiōs  
exoptātōs adferimus...

Mēmet oportet nūntiāre vōbīs,  
ō virī, trīste. Interrogāvī enim  
Hastingam in Terrā! Quī ait  
māteriam vix sufficientem  
nōbīs esse ut ē Lūnā  
excēdāmus!

Neque hoc fiet nisi  
redundantiā jēcerimus!  
Nōn necessariā tollenda  
dē mediō sunt, aut ē Lūnā  
omnīnō numquam  
excēdēmus!

Et trīste quidem! Decet  
nōs statim incipere! Occāsiō  
ēnāvīgandī tantum in XV  
hōrās est!

Posteā acerbum  
opus faciunt...

Jactāte! Jactāte omnia  
nōn omnīnō necessariā  
ad redeundum!

Occāsione autem ēnāvī-  
gandī appropinquante...

Ferē centum vāsōrum talenta  
jēcimus. Opus est autem nōs  
etiam centum decem librās  
exuere aut ē Lūnā nōn  
excēdēmus!

Num centum decem librās?  
Hecle, tantum rēs in sacculīs  
nōbīs ēiciendāe sunt, neque satis  
est! Quid faciēmus?

Quattuor quidem virī sē mutuō aspi-  
ciunt, ūnum autem terribile cōgitant.

Ūnum respondi potest. Homō  
enim plūs quam centum decem  
librās prēndit! Ergō ūnī ē nōbīs  
in Lūnā manendum est!

Mihi scīlicet!  
Maximus nātū enim  
et inūtilissimus  
sum...

Minimē, prāfectē Depstor.  
Nam summam glōriam adeptus  
sum, Lūnā inventā! Ipse  
manēbō!

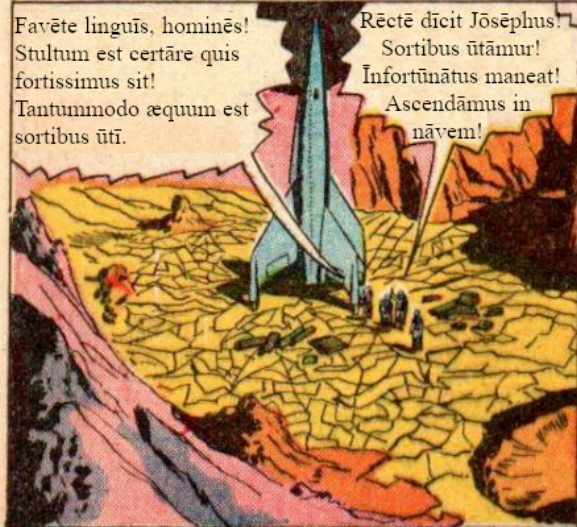

Ambō nōn rēctē dicitis! Ego  
sum gubernātor nauarchusque.  
Sicut ergō dux, jubeō vōs  
abire, dum ego maneō.

Dissentiō!

Favēte linguīs, hominēs!  
Stultum est certāre quis  
fortissimus sit!  
Tantummodo æquum est  
sortibus ūtī.

Rēctē dicit Jōsēphus.  
Sortibus ūtāmur!  
Īnfortūnātus maneat!  
Ascendāmus in  
nāvem!

Orbiculī cōnsimilēs hī  
quærendī mihi erant!  
Nunc autem parātī  
sumus sortibus ūtī!

Manē! Suāvis abiit!  
Erēpsit ā nāve!

Suavis, redi!  
Valēte, hominēs!  
Jūcundum reditum  
domum! Ūnum prō mē  
facite: omnēs puellās  
salūtate meīs verbīs,  
omnēs vērō in Terrā!

Ō stulte! Ō clāre, mīre, fortis stulte!  
Prīmum quidem illum in profectiōnem  
indūximus! Nunc autem ipse vult  
morī ut nōs salvī in Terram  
redeāmus! Brūclīnum potest  
eum laudāre!

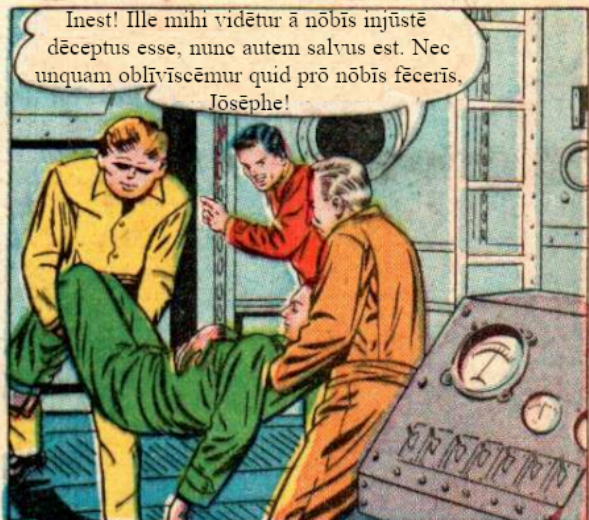

Resistite! Ille nōn manēbit hīc moritū-  
rus! Jam jam intelligē quōmodo  
omnēs salvī in Terram redeāmus!  
Audī, Jōsēphe! Radiophōnum nōn  
est nōbīs necessariū. Sī autem  
vestem astronauticā calceāmenta-  
que magnētica tua dē mediō  
sustulerimus antequam inierīs, bene  
erit! Nunc hēc fac...

Sānē, Jōsēphe! Jactā  
vestem radiophōnum calceā-  
menta! Tū quidem sine aere  
parumper eris, nōs autem  
tē intrōducēmus ante  
quam suffocātus eris!  
Parātus?

P...Parātus?

Inest! Ille mihi vidētur ā nōbīs injūstē  
dēceptus esse, nunc autem salvus est. Nec  
unquam oblīvīscēmur quid prō nōbīs fēcērīs,  
Jōsēphe!

Nunc possumus tūtō ēnavigāre!  
Ecce, proficīscimur!

Profecti sumus!  
In optimam Terram!
